

MT ST PATRICK COLLEGE STUDENT COMPUTER NETWORK POLICY

Acceptable Use Policy

Please read this document carefully before signing the agreement.

Network access is now available to students and teachers. The College network will also give users access to the Internet. The Internet is an electronic network connecting thousands of computers all over the world and millions of individual subscribers. It provides students and staff with access to electronic mail communication, information and news.

On a global network it is impossible to control all materials and a persistent user may discover controversial information. The College believes that the benefits of Internet access to educators and students, in the form of information resources and opportunities for collaboration, far exceed any disadvantages.
